August 1987

**T<sub>E</sub>Xeter**

T<sub>E</sub>X88, the Third European T<sub>E</sub>X Conference will take place at Exeter University, UK, from Monday, July 18th to Wednesday, July 20th, 1988. This conference seeks to maintain the high standard set by the previous European T<sub>E</sub>X conferences. In view of the rate at which T<sub>E</sub>X is expanding its areas of application, and the developments which will have taken place by next summer, papers are welcome from all areas of T<sub>E</sub>X, METAFONT and related subjects. Likely themes might include:

- \* desktop and traditional publishing with T<sub>E</sub>X
- \* document structure — L<sup>A</sup>T<sub>E</sub>X, SGML, ODA, etc.
- \* non-technical T<sub>E</sub>X and METAFONT applications  
(humanities, music, exotic languages)
- \* other technical areas (chemistry, physics, biology)
- \* parochial peculiarities (European considerations!)
- \* ai and expert system approaches
- \* T<sub>E</sub>X and *wysiwyg*
- \* METAFONT and fonts
- \* page description languages and dvi
- \* micro inputs
- \* macro inputs
- \* standards:
  - \* for `\special`
  - \* for printer drivers
  - \* for T<sub>E</sub>X macros
- \* T<sub>E</sub>X environments

The programme will be structured to include both long and short contributions. The proceedings will be published after the conference.

**Added Value**

We hope to run various workshops and participatory seminars before, during and after the conference. Specifically, we plan to organise workshops on ‘the design of documents’, L<sup>A</sup>T<sub>E</sub>X style files (and how to modify them), and on the use of METAFONT. Seminar rooms will be available during the conference for ‘birds of a feather’ and other *ad hoc* group meetings. There will be facilities for exhibitions by the vendors of T<sub>E</sub>X-related software, hardware and paperware. A number of micros will be available to allow the interchange of micro software, as well as demonstrations of particular packages etc.

**What does it cost?**

The total cost of the conference, including accommodation (from the evening of Sunday 17th July, through to Wednesday 20th) at Lopes Hall of Residence, meals, social activities, and the conference proceedings will be around £150. For non-residents, the charge will be about £100. The workshops and seminars before or after the conference will cost about £50 per day, which also includes accommodation and meals. Cheap rail fares within the UK are being arranged.

August 1987

**Where is Exeter University?**

Exeter is located in the sunny south west of England, close to Dartmoor, and only 10 miles from the sea. The University is approximately one mile north of Exeter city centre. There is an excellent train service to London and the North from St Davids Station. The M5 and M4 motorways provide quick and relatively painless access to London, the Midlands and the North. There is ample car parking space on campus. The local airport has daily connections to the continent, as well as UK internal destinations.
